

VEDANSH RAJ

DevOps & Cloud Engineer | GCP • AWS • Azure | Automation & AIOps

+91 6200807821 | bedanshshrivastava123@gmail.com | vedanshs.vercel.app | github.com/vedanshji

4+ years in IT & cloud engineering | 8 cloud certifications across GCP, AWS and Azure

PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with 4+ years in IT and cloud infrastructure, including 3 years delivering GCP infrastructure as code (Terraform), Kubernetes platform operations and CI/CD reliability, with hands-on AWS and Azure experience. Standardizes cloud environments, cuts incident time and cloud spend, and automates operational toil with pipelines, ChatOps, AI-assisted triage and ML-based anomaly detection. Built EcoOps, a carbon-aware, self-healing CI/CD framework (BITS Pilani B.Tech dissertation).

TECHNICAL SKILLS

Cloud: GCP (production: Compute Engine, GKE/Kubernetes, VPC, IAM, Cloud Run, Cloud Build, Secret Manager, Cloud Monitoring); AWS and Azure (hands-on, certified)

IaC & Containers: Terraform (modules, remote state management), Docker, Kubernetes (GKE, namespaces, ResourceQuotas, LimitRanges), Helm, Ansible, Chef, Puppet

CI/CD & GitOps: GitHub Actions, Jenkins, Codefresh, ArgoCD (GitOps), Git, GitHub, Bash and Python scripting

Observability & Incident Response: Prometheus, Grafana, Datadog, Cloud Monitoring, CloudWatch, ELK, Splunk, PagerDuty, Opsgenie, RCA, Incident Triage

AI / ML & Automation: scikit-learn, Anomaly Detection (IsolationForest), Self-Healing Systems, Generative AI, ChatOps, Predictive Automation

DevSecOps: Workload Identity Federation (OIDC), IAM least privilege, Secret Manager, Azure AD, Palo Alto

Languages & Systems: Python, Bash, Java, Linux, SQL, Hyper-V, Failover Clustering, Group Policy, DNS, DHCP

Ways of Working: Agile, ITIL, Jira, FinOps

EXPERIENCE

Wipro

Aug 2022 – Present

DevOps Engineer

Sep 2023 – Present

- Built platform automation prototypes using Python and Bash (automated pipeline rollbacks, ChatOps bots, AI-assisted triage tools) that removed 10+ hours of weekly toil.
- Provisioned and managed enterprise GCP infrastructure with Terraform (modules and remote state management): standardized project hierarchies, VPC networking and least-privilege IAM roles.
- Core engineer in the Kubernetes (GKE) squad: automated multi-tenant namespace provisioning via Terraform, deployed workloads with Helm and GitOps (ArgoCD), tuned ResourceQuotas and limit ranges, and resolved pod scheduling bottlenecks.
- Reviewed pull requests, auditing code and Terraform plan outputs against security guardrails before merge to main, ensuring zero-drift, reliable deployments.
- Troubleshoot incidents across VPC routing, Compute Engine VMs and IAM authentication, reducing MTTR by 30%.
- Ran FinOps cost reviews, eliminating orphaned resources and rightsizing compute to cut cloud spend by 20%.

Server Administrator

Aug 2022 – Sep 2023

- Administered hybrid Linux and Windows Server fleets (Linux administration and shell scripting): DNS, DHCP, Active Directory (Azure AD) and Group Policy Objects (GPO).
- Maintained high-availability clusters (Hyper-V, Failover Clustering) and resolved P1/P2 production incidents with zero downtime.

PROJECTS

EcoOps: Carbon-Aware, Self-Healing CI/CD Pipeline | B.Tech Dissertation, BITS Pilani

Jan – Jun 2026

- Four-layer CI/CD framework on GCP that ingests real-time carbon intensity data (Electricity Maps, Google Carbon Footprint APIs) and selects the lowest-carbon GCP region via Terraform at build time.
- Unsupervised anomaly detection (scikit-learn IsolationForest) on six pipeline health metrics drives a self-healing engine with three remediation modes (Immediate, Deferred, Lean Heal) that factors in carbon cost.
- Grafana + Prometheus dashboards for emissions and MTTR; keyless Workload Identity Federation (OIDC) from GitHub Actions to GCP; validated Cloud Run deployments via Cloud Build triggers with zero secret exposure.

CERTIFICATIONS (8)

AWS: Certified Solutions Architect; Certified Cloud Practitioner

Google Cloud: Professional Cloud DevOps Engineer; Associate Cloud Engineer (ACE); Machine Learning; Generative AI (Level 3)

Microsoft / GitHub: Azure Fundamentals (AZ-900); GitHub Actions (CI/CD Automation)

EDUCATION & AWARDS

B.Tech, Information Systems | BITS Pilani (Completed)

Jul 2023 – Sep 2026

Diploma, Electronics & Communication Engineering | Government Polytechnic, Ranchi (JUT Ranchi)

2019 – 2022

Awards: Multiple client Excellence Awards: Canara HSBC Life Insurance, AIC of India, ANZ Bank.
